## REPORT

4563-22CA

Fish Video Update

To: Rich Marovich  
Chris Lee

Report: Putah Creek Fish Video Project

### Report:

The images below are clips from recent video taken on the north side of the Pickerel Weir in the plunge pool below the weir. The upper image is facing directly into the weir and the sun. That view was typically showing 8-9 trout that appeared to be four distinct sizes. The second view (larger and darker trout) typically showed up to eight (8) trout in that size range. I will be posting video of both views labeled as Research Area 1A to avoid directly identifying where the images were taken. Images of both are attached with this file for your use. Video views will be available at [www.creekman.com](http://www.creekman.com)
