

## Mid City Nursery Plant List for Low-Water Pollinator Garden Design Template

### Groundcover

- 'Emerald Carpet' Manzanita (*Arctostaphylos*)\*
- 'Anchor Bay' Ceanothus (*Ceanothus gloriosus* var. *gloriosus*)\*
- Silver Carpet (*Dymondia*)
- Creeping Myoporum (*Myoporum parvifolium*)
- Carmel Creeper Ceanothus (*Ceanothus griseus horizontalis*)\*

### Short Shrubs, Herbaceous Plants, and Grasses (1-3 ft)

- Yarrow (*Achillea millefolium*)\*
- Sundrops (*Calylophus*)\*
- Margarita BOP Penstemon (*Penstemon heterophyllus*)\*
- Mickie Rock Rose (*Cistus* h. "Mickie")
- Woodland Sage (*Salvia nemorosa*)\*
- De La Mina Verbena (*Verbena lilacina*)\*
- Sageleaf Rockrose (*Cistus salviifolius*)\*
- Autumn Sage (*Salvia greggii*)\*
- New Zealand Hairy Sedge (*Carex testacea*)
- Blue Fescue (*Festuca*)\*
- Mat Rush (*Lomandra*)

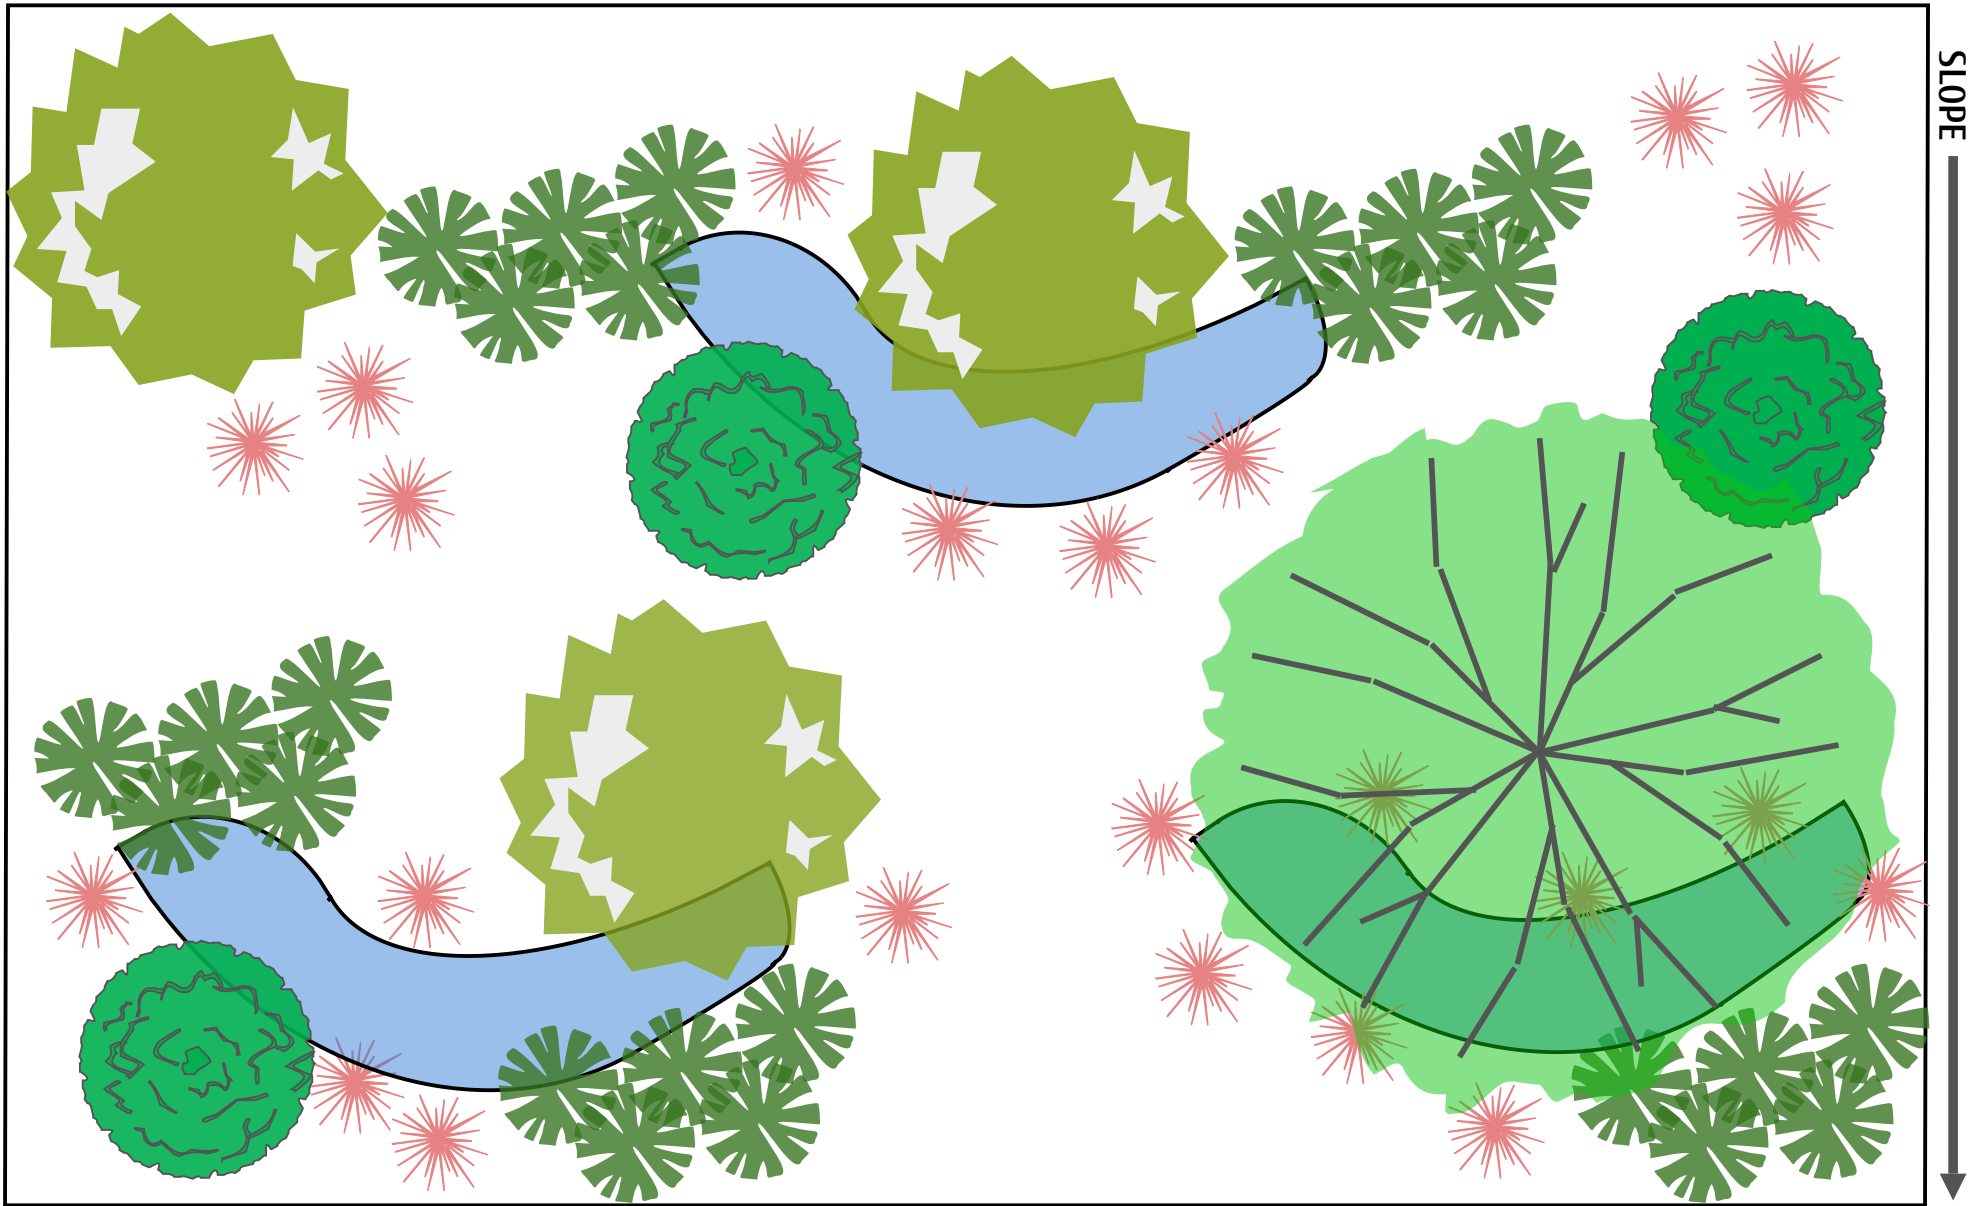

### Mid-Size Shrubs (3-6 ft)

- Woolly Grevillea (*Grevillea lanigera*)
- Coyote Bush (*Baccharis pilularis*)\*
- Lantana (*Lantana camara*)\*
- 'Kaleidoscope' Glossy Abelia (*Abelia x grandiflora*)
- 'Cousin Itt' Acacia (*Acacia cognata*)
- Mexican Sage (*Salvia leucantha*)\*
- Sweet Box (*Sarcococca*)
- Cleveland Sage (*Salvia clevelandii*)\*
- Jerusalem Sage (*Phlomis*)\*

### Trees and Large Shrubs

- Blue Hibiscus (*Alyogyne huegelii*)
- 'Howard McMinn' Manzanita (*Arctostaphylos*)\*
- 'Dark Star' Mountain Lilac (*Ceanothus*)\*
- Toyon (*Heteromeles arbutifolia*)\*
- Tree Mallow (*Lavatera*)\*
- 'Little Ollie' Dwarf Olive (*Olea europaea*)
- Yeddo Hawthorn (*Rhaphiolepis umbellata*)\*
- Coffeeberry (*Frangula californica*)\*
- Redbud (*Cercis* spp.)\*
- Hop-Bush (*Dodonaea*)
- Pomegranate (*Punica granatum*)\*
- Crape Myrtle (*Lagerstroemia*)\*

# Mid City Nursery

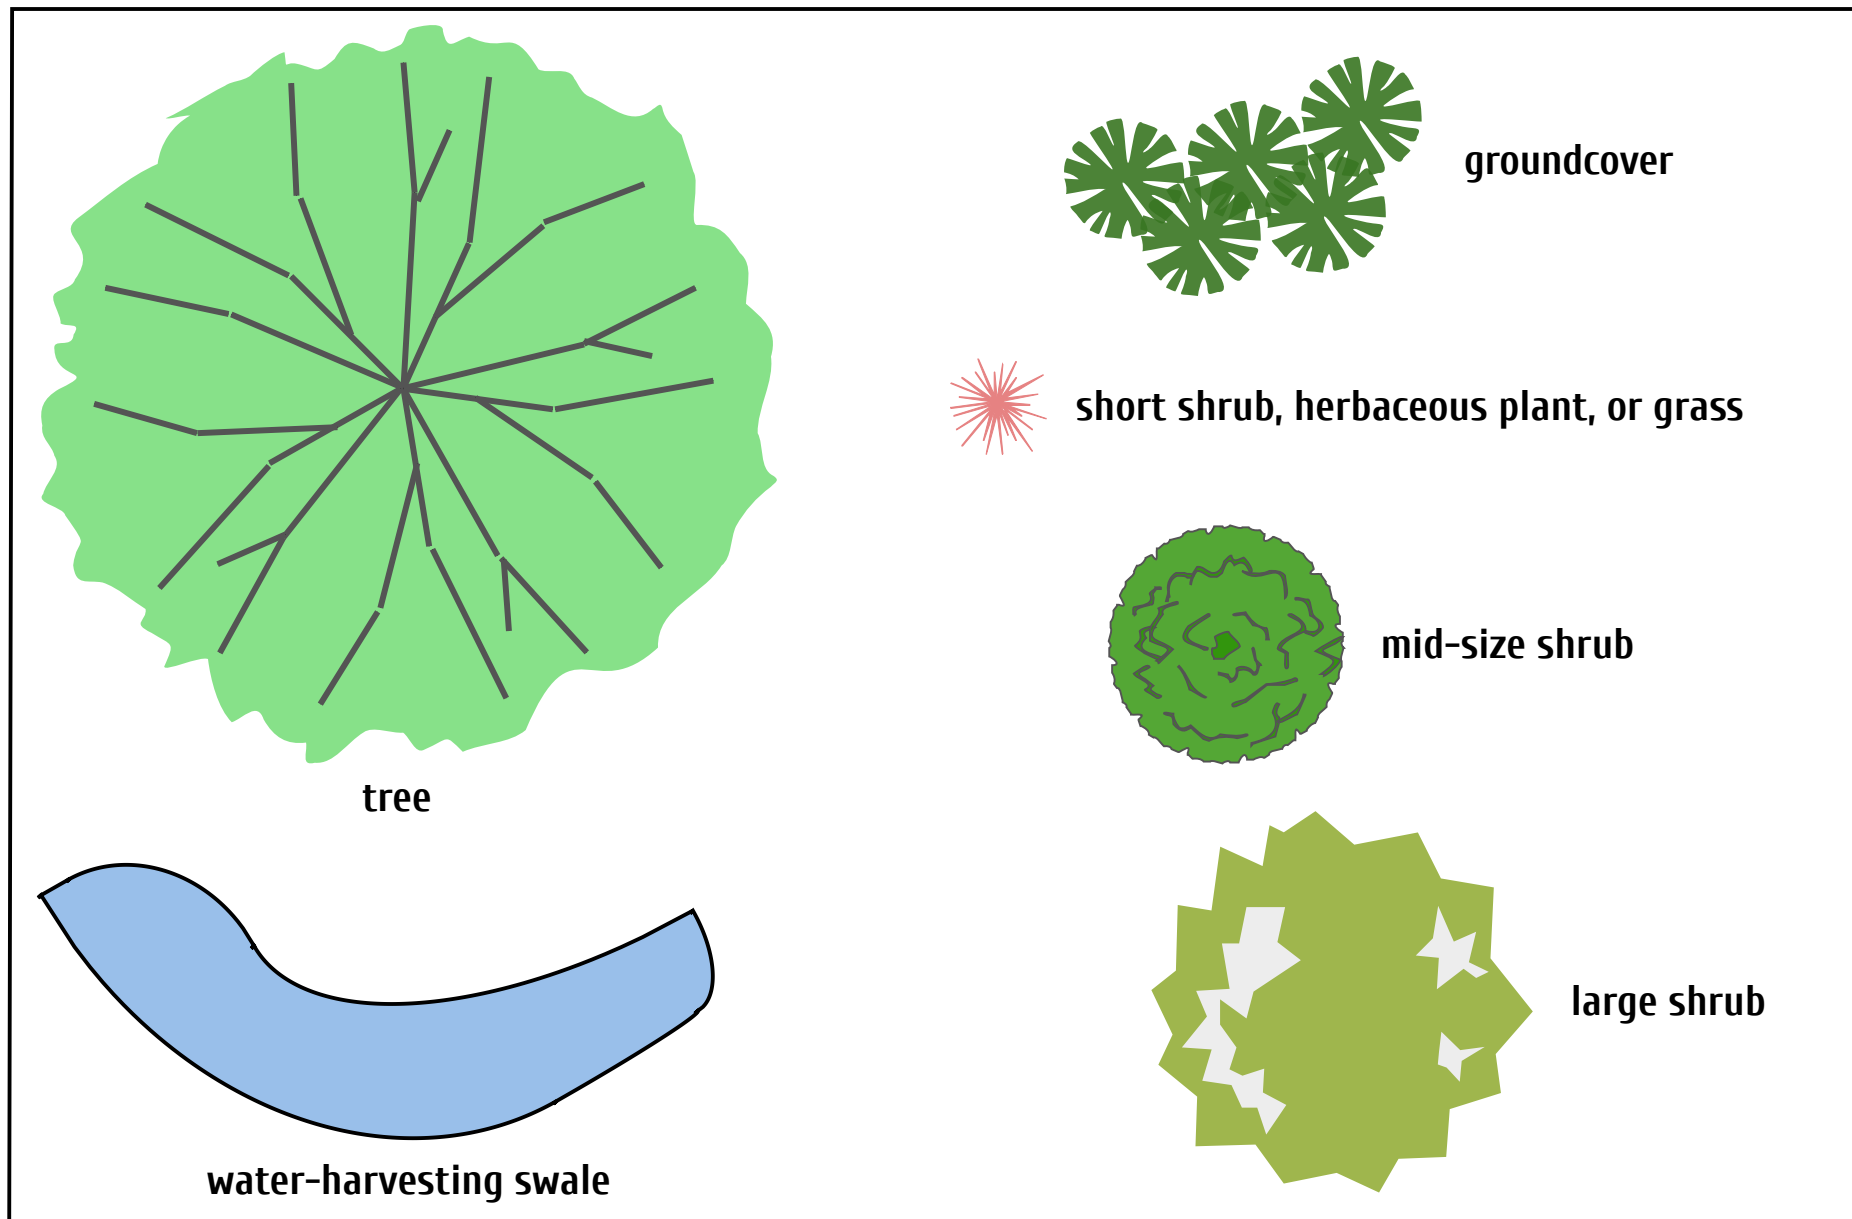

## Low-Water Pollinator-Friendly Garden Design Template

By Grow With The Flow in partnership with Sustainable Solano

Heath Griffith // 707.208.5342

Scale: 1" = 4'  
Dimensions: 1000 sq ft  
(40' x 25')

**NOTES:**

- Designed for use with Mid City Nursery Plant List for Low-Water Pollinator Garden Design Template
- All plants are low-water use, but only after becoming established on the landscape (1-2 years of high-water use)
- Water-harvesting swales are most effective on contour, at least 2 feet wide, and filled with woodchips
- 2-3 inches of arbor mulch covering the surface of the soil will decrease plant water needs and increase soil moisture
