SCOPE OF SERVICES

The Habitat Restoration and Stewardship program will provide opportunities for youth and adults in Solano and Yolo Counties to get involved with restoration and stewardship programs in the Putah Creek watershed. The program will train 40 people per year in the basics of habitat restoration and management with a focus on Putah Creek. The program is also called the OneCreek internship.

- ***Deliverables:*** *Putah Creek Council will provide an annual update of the program to the Lower Putah Creek Coordinating Committee (LPCCC) and a second forum that may include the SCWA Board of Directors. A concise annual report will also be provided that summarizes the locations that were assisted by the OneCreek program including a general overview of the program.*

Below is a copy of the consultant's proposal.

**Proposal to Solano County Water Agency for
Habitat Restoration Program Funding
for Fiscal Years 2026/27 and 2027/28**

Putah Creek Council (PCC) proposes to provide habitat restoration and stewardship programming to residents of Solano and Yolo Counties for a two-year period commencing July 1, 2026 and ending June 30, 2028. Total cost of the two-year contract will be \$304,620.00.

Since the signing of the Putah Creek Accord in 2000, PCC has been partnering with SCWA to provide opportunities for youth and adults to get involved in restoration and stewardship of the Putah Creek watershed. In 2026-28, we will offer OneCreek, our internship program, which trains 40 adults per year in the basics of habitat restoration and management with a focus on projects along Putah Creek. This program ties directly to the goals of the Healthy Rivers and Landscapes initiative.

The OneCreek restoration internship program provides opportunities for adults (college age and older) to engage in hands-on restoration activity. Beginning in 2023-24, PCC began offering the OneCreek program four times a year (winter, spring, summer, fall). Each quarter, PCC coordinates sixteen watershed protection or restoration events in the Lower Putah Creek region offered jointly with partner agencies. In past years, OneCreek interns have installed native plants at habitat restoration sites, checked and repaired irrigation systems, removed invasive plants, and designed and installed native plant identification and interpretive markers, among other tasks. Interns also assist at SCWA's native plant nursery and in the Demonstration Garden, both at Sackett Ranch.

Each quarter, ten interns are paid minimum wage for 84 hours for participation. OneCreek internships are designed to:

- Give interns exposure to a variety of restoration sites and practices;
- Assist partner agencies (including SCWA) in completing their restoration and stewardship projects;
- Introduce interns to our restoration partners and model partnership-building; and
- Foster a sense of belonging to something bigger with a larger impact in the watershed.

These internships help cultivate the next generation of creek and watershed stewards, and complete important restoration and stewardship projects throughout the Putah Creek watershed.

OneCreek internships provide a great door to the field of watershed/ environmental restoration. Several former interns have returned to the program in subsequent years and taken on leadership roles. Other OneCreek interns have gone on to major in environmental science in college, volunteer for our year-round Putah Creek Stewardship Team to receive additional training and experience, or secured paid positions with UCD, SCWA, or other organizations involved in habitat restoration and management.
